Cannot Find Port Issues (GolfBuddy Plus, Pro and Tour)

Step 1
On the bottom left of your keyboard, there should be a "windows key" located between the Control and Alt keys. Hold this key down and press the letter "R" down at the same time.

Step 2
This should bring up a "Run" menu. Type the following in the box: devmgmt.msc Then hit "Ok".
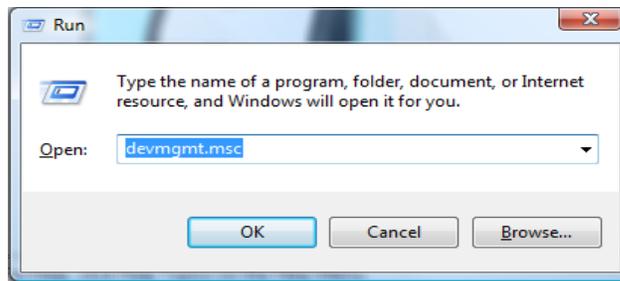

Step 3
This will bring up a device manager. Look for any yellow question marks listed under "Other devices". Select the device which is listed underneath "Other devices".
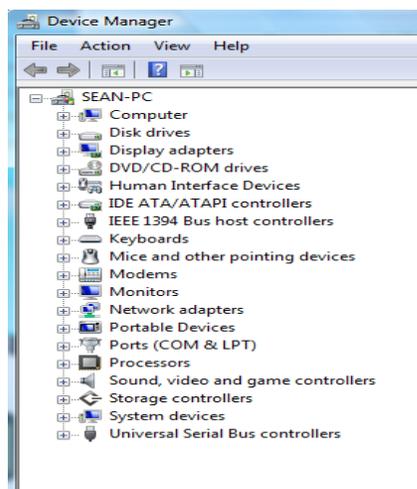

Step 4
Highlight this and double click. This will bring up the properties for this device. On the top there should be a "General" tab To the left of the "General" tab there should be a "Driver" tab.

Step 5
Click on the "Driver" tab and click on "Update Driver".

Step 6
Make sure Search automatically is selected and then click on Next.

Step 7
Click on Next continuously until it updates the driver.
